I3E project is a project funded under the **South East Europe (SEE)** initiative with an aim to help towards the transformation of the SEE area into a knowledge-based innovation-driven economy. The project places emphasis on two leading edge knowledge-intensive and export-oriented technology sectors that may create a competitive advantage for the area, namely industrial informatics and embedded systems. The main project outcomes include a Strategic Research Agenda in the aforementioned sectors making possible the alignment of research efforts in the area and a Methodology Guideline for Innovation stemming from best practices relevant to the transformation of research into innovation. The project will seek the active involvement of all associated stakeholders in the participating countries as well as the building of consensus with reference to its major outcomes.
