I3E International Conference at Athens InnoCenter

Maroussi, 28.05.2012: The final conference of the I3E project will take place in **Athens on May 28th, 2012**. The conference will be held at the **Corallia, Athens InnoCenter** located in Maroussi, Athens and will be live broadcasted to the Corallia **Patras InnoHub**. The conference aims at disseminating the main project results, i.e. **the Strategic Research Agenda** in the sectors of Embedded Systems and Industrial Informatics and the **Methodology Guide on Innovation**, built during the three year

long project duration.

About I3E

I3E project is a project funded under the **South East Europe (SEE)** initiative with an aim to help towards the transformation of the SEE area into a knowledge-based innovation-driven economy. The project places emphasis on two leading edge knowledge-intensive and export-oriented technology sectors that may create a competitive advantage for the area, namely industrial informatics and embedded systems. The main project outcomes include a Strategic Research Agenda in the aforementioned sectors making possible the alignment of research efforts in the area and a Methodology Guideline for Innovation stemming from best practices relevant to the transformation of research into innovation. The project will seek the active involvement of all associated stakeholders in the participating countries as well as the building of consensus with reference to its major outcomes.
